Sixth Form Environment Meeting 2026

The Nature Commission and the States of Guernsey are delighted to host the Sixth Form Environment Meeting.

A range of presentations will be given by students from the Sixth Form Centre and The Ladies' College. There will also be an activity about the States of Guernsey Marine Spatial Plan where students will learn more, give their views and be able to comment on this future plan for Guernsey's marine environment.

The event will be hosted at Les Rocquettes Hotel, St Peter Port. If you are travelling to the venue by car, please park in the rear car park.

Theme

The theme for the Inter-Island Environment Meeting (IIEM) held on Wednesday 30th September and Thursday 1st October was 'Nature for the Next Generation'. The Sixth Form Environment Meeting is an additional half-day to give the next generation a platform to share their views and ideas.

As future custodians of the natural world, students will become the decision-makers and leaders responsible for protecting, managing and sustaining Guernsey's ecosystems. The Sixth Form Environment Meeting gives a voice to the next generation who will become environmental leaders of the future.

Aims and Objectives

This is the first time the Nature Commission and the States of Guernsey have hosted a Sixth Form Environment Meeting. The aim is for sixth form students to come together to give presentations on issues of importance to them, share ideas, learn from each other and collaborate for the benefit of nature and people.

Key timings for presentations and activities

08:45 - 08:55

Arrival

08:55 - 09:05

**Housekeeping
Welcome**

09:05 - 09:20
